

Number Punch

Punch holes into the cards to match the corresponding number on the cards.

What You Will Need

- Hole puncher
- Paper (cardstock if possible)
- Marker

Instructions

- Write out the numbers your child is learning (1-20) on pieces of paper about the size of index cards. Leave enough room for your child to punch out the correct amount of holes.
- Show your child how to punch holes into paper with a hole punch.
- Once your child is comfortable using the hole punch, ask him or her to punch out the corresponding number of holes that is written on each card. If the number written on the paper is 6 he or she should punch 6 holes into that piece of paper.
